

# Key Updates on Import Control System (ICS) 2.0

## Key Updates on Import Control System (ICS) 2.0

NTG Road would like to notify you about upcoming changes in the customs process under ICS 2.0. The regulations impact all transports through the EU, Switzerland, and Norway. ICS 2.0 is the system used by the EU to manage Entry Summary Declarations (ENS) for security checks on goods.

### Actions Required

- Ensure the correct EORI number (or VAT for CH/NO/NI) is provided.
- Include a clear description of goods and the 6-digit HS code for each item.

### Missing or incorrect information may lead to

- Declined declarations or customs intervention
- Delays at customs
- Heightened security checks
- Delays

### Recent Changes

Since December 31, 2022, temporary storage declarations must include a 6-digit HS code and the consignee's EORI number. Vague descriptions like "samples" or "clothing" will no longer be accepted.
