AEROSPACE, DEFENSE, HAZARDOUS AND HIGH VALUE GOODS SUPPLY CHAIN

Your safe, reliable partner when trust must be earned by actions

Aerospace, defense, hazardous and high value goods supply chain

Aerospace, defense, hazardous and high value goods transport are not suited for standard solutions. NTG Air & Ocean Oy – Finland has many years of experience in handling of confidential assignments.

Safety first concept

Foreign trade controls, compliance with the law and official rules and regulations are at the center of our operations. We use real-time information for each assignment when we clarify all the parties related to the assignment and reduce our client's risk. We have carefully protected our data and preparations for the use of the IEC/ISO 27001 standard have progressed.

Quality – no compromise

We are an ISO9001 & ISO140001 certified company with high standards. We measure several things in our operations and take care of the modernity of the processes. Customer satisfaction NPS results are at a level of 72, which is very good.

Trust based relationship with all stakeholders

We build trust by doing, we rely on facts and always keep confidential matters confidential. We use our experience and knowledge every day when we serve our customers, when destinations and conditions are challenging but solutions are needed. Close co-operation with partners and authorities is needed when you deal with confidential assignments.

In Aerospace, defense, hazardous and high value goods transport we can offer solution and services using below transportation format.

- Air freight
- Air charter
- Ocean freight
- LCL
- FCL
- Oversized cargo
- Roro
- Break bulk
- Vessel charter
- Online sanctions screening process
