

ISO 27001 Certification

NTG Group IT successfully attained ISO 27001 certification in December 2024. This internationally recognised standard for information security management marks a significant achievement, culminating an intensive 18-month initiative dedicated to strengthening our security posture.

ISO 27001 certification underscores our unwavering commitment to maintaining secure, resilient, and compliant IT operations. It affirms that our practices align with global regulatory frameworks and industry benchmarks, reinforcing our role as a trusted partner in the digital ecosystem.

Jens Emil Vestergaard Jensen, Chief Information Security Officer, commented:

“We extend our sincere gratitude to everyone who contributed to this accomplishment, particularly our cybersecurity team. Their dedication and expertise were instrumental in navigating the rigorous documentation, implementing robust security controls, and ensuring operational continuity while effectively managing security incidents.”

Strategic Benefits of ISO 27001 Certification:

- **Enhanced trust and transparency**
Demonstrates our corporate responsibility and builds confidence among customers, partners, and investors.
- **Competitive advantage**
Enables us to meet stringent security requirements across international shipping, freight forwarding, and supply chain management—positioning us to win contracts in highly regulated sectors such as healthcare, defense, and critical infrastructure.
- **Operational efficiency**
Streamlines RFX processes, audits, and compliance assessments by serving as recognized proof of adherence to GDPR, NIS2, and other regulatory standards—reducing the time and resources required to respond to complex questionnaires.
- **Risk mitigation**
Strengthens our defense against cyber threats, lowers operational and financial exposure, and contributes to reduced insurance premiums through improved risk management.
